AEG Power Solutions Secures Power for CNOOC Petrochemical Cluster in Huanghua

CNOOC (China National Offshore Oil Corporation) has selected AEG PS' power systems to secure critical loads applications at its petrochemical production center, which is located in Huanghua City in the province of Hebei in China.

The center includes a crude oil distillation facility with a capacity of 2.5 million tons, a catalytic cracking unit, a storage tank area for gas and petrochemical by-products and a sewage treatment plant.

AEG Power Solutions has provided fifteen Protect 8 UPS and two Protect 4 UPS, as well as batteries, to secure the power supply to the main critical equipment of this sensitive operation center. The systems is powering applications such as the control system of torch recovery and the transformer substation for recycled water, as well as the transformer substation and control system of air partial pressure.

AEG Power Solutions has already provided UPS and industrial chargers to CNOOC to secure power on various projects since 2010, such as the Kenli and Nanping offshore drilling platforms, as well as the Hainan East and Zhejiang Daxie petrochemical projects.
