AEG Power Solutions Selected by Fincantieri to Provide Power Supply Solutions for Cruise Vessel

Fincantieri S.p.A. has selected AEG PS for its power systems solutions to secure all critical loads applications on board Seabourn Encore, an ultra-luxury cruise ship that Fincantieri built for Seabourn, a brand of Carnival Corporation.

A combination of AC (Protect 8 and Protect 4) UPS and DC (Protect TPR) systems have been delivered to Fincantieri. They are securing the electrical power supply for automation, ship digital communications, public address safety system, emergency diesel generator and low location lighting. Power supply is a critical part of security on board.

Given the technical challenge, Fincantieri selected AEG Power Solutions based on the high reliability of its products and their perfect match to the ship builder's high level of requirements, and in particular their stable performance stable in harsh environments.
