

CUSTOMER REFERENCE

DATA-IT/2007/001

CUSTOMER INFORMATION

STRATO AG, Germany

(TECHNICAL) SPECIFICATIONS

Location	Germany
Application	Datacenter
Architecture	UPS + diesel generators up to 4 weeks autonomy time
Products AEG PS	Protect 4.33 UPS systems 20 x 220 kVA
Efficiency level	Up to 94%

UPS SYSTEMS ASSURE DEPENDABLE WEBHOSTING

STRATO AG relies on the expertise of AEG PS. Servers depend on an uninterruptible supply of electrical power for high-quality IT systems. STRATO, Europe's second-largest web hosting and web application provider, is using 20 AEG PS UPS systems to ensure that their data centers continue operating during power outages. Since, even small power interruptions can affect the durability and quality of the servers, the AEG PS UPS systems use battery back-ups which are backed up by diesel generators to guarantee services for up to 4 weeks. Moreover, STRATO has been using renewable energy sources in an effort to achieve 100% carbon-neutral data centers.
